Transportation

Impact Of Technology

US CEOs want innovation as much as new markets and customers from future alliances

PWC - 2015 US CEO Survey

<http://www.pwc.com/us/en/ceo-survey/index.html>

36%

of US CEOs say they entered or considered entering a different industry at some point over the past three years

Half

Half of US CEOs believe a significant competitor is emerging or could emerge from technology sector versus 32% of CEOs globally.

Think it's likely competitors will compete in industries other than their own over the next three years

61%

COSTS

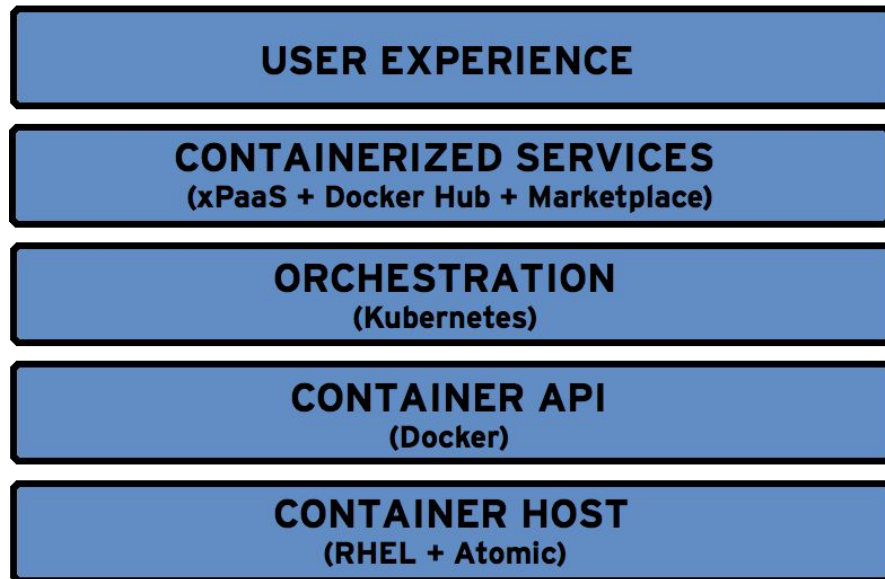

What Is OpenShift?

Red Hat's Container Application Platform

OpenShift 3.2

- Standard containers API
- Web-scale orchestration
- Container optimized OS
- Expanded choice of frameworks and services
- Improved developer & operator experience

Why Select OpenShift?

Trusted Container Host

- Enterprise-grade security, stability & reliability with Red Hat Enterprise Linux 7
- Minimal footprint, container optimized, auto updated OS with Atomic Host
- Certified to run Linux containers at scale

CVE-2016-3697

It was found that Docker would launch containers under the specified UID instead of a username. An attacker able to launch a container could use this flaw to escalate their privileges to root within the launched container.

Find out more about CVE-2016-3697 from the [MITRE CVE dictionary](#) dictionary and [NIST NVD](#).

CVSS v2 metrics

NOTE: The following CVSS v2 metrics and score provided are preliminary and subject to review.

Base Score	6
Base Metrics	AV:N/AC:M/Au:S/C:P/I:P/A:P
Access Vector	Network
Access Complexity	Medium
Authentication	Single
Confidentiality Impact	Partial
Integrity Impact	Partial
Availability Impact	Partial

Impact:

Moderate

Public Date:

2016-04-22

Bugzilla:

[1329450](#): CVE-2016-3697 docker: privilege escalation via confusion of usernames and UIDs

Driving & Adopting Standards

Isolation with Linux Containers

- Isolating applications on host operating systems
- Security
- Portability across host systems

Container format with Docker

- Interface for communication, configuration, data persistence & provisioning
- Content agnostic
- Infrastructure agnostic

Orchestration With Kubernetes

- Orchestrate containers at scale
- Define application topologies
- Handle container networking
- Manage container state
- Schedule across hosts

Registry/Container Discovery

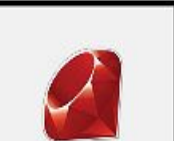

- Easily find and consume trusted container images
- Federate consumption libraries
- Promote consistency and reuse

Application Services

- Access certified container images from Red Hat & ISVs
- Choice of language runtimes, databases, etc.
- xPaaS application & integration services powered by JBoss
